

# VPX581

Zynq UltraScale+ FPGA, FMC  
Carrier, 3U VPX

## Key Features

- Xilinx UltraScale+ XCZU15EG FPGA
- 8 GB of 64-bit wide DDR-4 Memory (single bank) with ECC
- MPSoC with block RAM and UltraRAM
- Health Management through dedicated Processor

## Benefits

- FMC site on a single module 3U VPX
- Electrical, mechanical, software, and system-level expertise in house
- Full system supply from industry leader
- AS9100 and ISO9001 certified company

**vadatech**  
THE POWER OF VISION

# VPX581

The VPX581 is a 3U VPX FPGA Carrier with single FMC (VITA 57) interface. The unit has an on-board, re-configurable FPGA which interfaces directly to the VPX P1 connector, FMC DP0-9 and all FMC LA/HA/HB pairs.

The FPGA has interface to a single DDR4 memory channel (64-bit wide). This allows for large buffer sizes to be stored during processing as well as for queuing the data to the host.

The VPX581 is based on Xilinx UltraScale+ XCZU15EG MPSoC FPGA with single FMC site. The FPGA has 3528 DSP Slices and 746k logic cells. The XCZU15EG includes quad-core ARM application processor, dual-core ARM real-time processor and Mali™ graphics processing unit, as well as over 26 Mb of block RAM and 31 Mb of UltraRAM.

The module has on board 64 GB of Flash, 128 MB of boot flash and an SD Card as an option.

# Reference Design

VadaTech provides an extensive range of Xilinx based FPGA products. The FPGA products are in two categories; FPGA boards with FMC carriers and FPGA products with high speed ADC and DACs. The FPGA products are designed in various architectures such as AMC modules, PCIe cards and Open VPX.

VadaTech provides a reference design implementation for our FPGAs complete with VHDL source code, documentation and configuration binaries. The reference design focuses on the I/O ring of the FPGA to demonstrate low-level operation of the interconnections between the FPGA and other circuits on the board and/or backplane. It is designed to prove out the hardware for early prototyping, engineering/factory diagnostics and customer acceptance of the hardware, but it does not strive to implement a particular end application. The reference VHDL reduces customer time to develop custom applications, as the code can be easily adapted to meet customer's application requirements.

The reference design allows you to test and validate the following functionality (where supported by the hardware):

- Base and Fabric channels
- Clocks
- Data transfers
- Memory
- User defined LEDs

Xilinx provides Vivado Design Suite for developing applications on Xilinx based FPGAs. VadaTech provides reference VHDL developed using the Vivado Design Suite for testing basic hardware functionality. The reference VHDL is provided royalty free to use and modify on VadaTech products, so can be used within applications at no additional cost. However, customers are restricted from redistributing the reference code and from use of this code for any other purpose (e.g. it should not be used on non-VadaTech hardware).

The reference VHDL is shipped in one or more files based on a number of ordering options. Not all ordering options have an impact on the FPGA and a new FPGA image is created for those options that have direct impact on the FPGA. Use the correct reference image to test your hardware. For more information, refer to the FPGA reference design manual for your device which can be accessed from customer support site along with the reference images.

## Supported Software

- Default FPGA image stored in flash memory
- Linux BSP
- Build Scripts
- Device Driver
- Reference application projects for other ordering options

The user may need to develop their own FPGA code or adapt VadaTech reference code to meet their application requirements. The supplied pre-compiled images may make use of hardware evaluation licenses, where necessary, instead of full licenses. This is because VadaTech does not provide licenses for the Vivado tool or Xilinx IP cores, so please contact Xilinx where these are required.

Xilinx also provides System Generator tools for developing Digital Signal Processing (DSP) applications.

See the following links:

[Xilinx Vivado Design Suite](#), [Xilinx System Generator for DSP](#).

# Specifications

<b>Architecture</b>		
<b>Physical</b>	<b>Dimensions</b>	3U, 1" pitch
<b>Type</b>	<b>FPGA</b>	Xilinx Zynq UltraScale+ with FMC site
<b>Configuration</b>		
<b>Power</b>		~25W FPGA load dependent and no FMC
<b>Front Panel</b>	<b>Interface Connectors</b>	Single FMC Slot
	<b>Micro USB</b>	RS-232 from FPGA and RS-232 from Health Management
	<b>LEDs</b>	User defined by the FPGA and Health Management
<b>On-board Interfaces</b>		
<b>VPX Interfaces</b>	<b>Slot Profiles</b>	See ordering options
	<b>Rear IO</b>	CLK on P0
		Dual x4 fabric (VITA 46.3, 46.4, 46.7) on P1
		SAS/SATA on P1
		Dual GbE (VITA 46.6) on P1
		Dual x4 fabric (VITA 46.3, 46.4, 46.7) on P2
		8 x LVDS on P2
<b>Software Support</b>	<b>Operating System</b>	Linux
<b>Other</b>		
<b>MTBF</b>		MIL Hand book 217-F@ TBD hrs
<b>Certifications</b>		Designed to meet FCC, CE and UL certifications, where applicable
<b>Standards</b>		VadaTech is certified to both the ISO9001:2000 and AS9100B:2004 standards
<b>Warranty</b>		Two (2) years

## INTEGRATION SERVICES AND APPLICATION-READY PLATFORMS

VadaTech has a full ecosystem of OpenVPX, ATCA and MTCA products including chassis platforms, shelf managers, AMC modules, Switch and Payload Boards, Rear Transition Modules (RTMs), Power Modules, and more. The company also offers integration services as well as pre-configured Application-Ready Platforms. Please contact VadaTech Sales for more information.

# Ordering Options

## VPX581 – 0BC-DEF-GHJ

	<b>D = FPGA Speed</b>	<b>G = Applicable Slot Profiles</b>
	1 = Reserved 2 = High 3 = Highest	0 = 5 HP
<b>B = Expansion Plane (P2)</b>	<b>E = Clock Holdover Stability</b>	<b>H = Environmental</b>
0 = Not routed 1 = Dual x4	0 = Standard (XO) 1 = Stratum-3 (TCXO)	See Environmental Specification Table below
<b>C = SD Card</b>	<b>F = PCIe Option (P1) for Data Port 1/2*</b>	<b>J = Conformal Coating</b>
0 = None 1 = 32 GB	0 = None 1 = PCIe/None 2 = None/PCIe 3 = PCIe/PCIe	0 = None 1 = Humiseal 1A33 Polyurethane 2 = Humiseal 1B31 Acrylic

Notes: \*ZU15EG does not have hard-core PCIe. Customers must purchase the soft core PCIe from Xilinx.

## Environmental Specification

Option H	Air Cooled		Conduction Cooled		
	H = 0	H = 1	H = 2	H = 3	H = 4
<b>Operating Temperature</b>	AC1* (0°C to +55°C)	AC3* (-40°C to +70°C)	CC1* (0°C to +55°C)	CC3* (-40°C to +70°C)	CC4* (-40°C to +85°C)
<b>Storage Temperature</b>	C1* (-40°C to +85°C)	C3* (-50°C to +100°C)	C1* (-40°C to +85°C)	C3* (-50°C to +100°C)	C3* (-50°C to +100°C)
<b>Operating Vibration</b>	V2* (0.04 g2/Hz max)	V2* (0.04 g2/Hz max)	V3* (0.1 g2/Hz max)	V3* (0.1 g2/Hz max)	V3 (0.1 g2/Hz max)
<b>Storage Vibration</b>	OS1* (20g)	OS1* (20g)	OS2* (40g)	OS2* (40g)	OS2* (40g)
<b>Humidity</b>	95% non-condensing	95% non-condensing	95% non-condensing	95% non-condensing	95% non-condensing

Notes: \*Nomenclature per ANSI/VITA 47. Contact local sales office for conduction cooled (H = 2, 3, 4).

## Related Products

VPX592

- 3U FPGA carrier for FPGA Mezzanine Card (FMC) per VITA 46 and VITA 57
- Xilinx Kintex UltraScale™ XCKU115 FPGA
- High-performance clock jitter cleaner

VPX599

- Xilinx Kintex UltraScale™ XCKU115 FPGA
- Dual ADC @ 6.4 GSPS 12-bits
- Dual DAC @ 12 GSPS 16-bits (AD9162 or AD9164)

# Choose VadaTech

## We are technology leaders

- First-to-market silicon
- Constant innovation
- Open systems expertise

## We commit to our customers

- Partnerships power innovation
- Collaborative approach
- Mutual success

## We deliver complexity

- Complete signal chain
- System management
- Configurable solutions

## We manufacture in-house

- Agile production
- Accelerated deployment
- AS9100 accredited
