

REACH and RoHS DECLARATION OF CONFORMITY

ECRIN Systems markets products that comply with the requirements of REACH regulation 1907/2006 / EC (the "Regulation") and of the RoHS Directive 2011/65 / EU as amended by Directive 2015/863 / EU (the " Directive ").

Within the meaning of REACH, ECRIN Systems, as a manufacturer of electronic and electrotechnical products, is a "downstream user".

Our products are therefore not subject to registration and our obligations are as follows:

- Observe the instructions given in the safety data sheets that we receive.
- Contact our suppliers if we have new information on the hazards of the substance or preparation, or if we believe that the risk management measures are inadequate.
- Inform our customers about the dangers and conditions of safe use of our products, if the content of certain substances of very high concern, candidates for authorization, exceeds a concentration of 0.1% w / w in the articles we produce. .

In accordance with the regulations,

- ECRIN Systems is in permanent active contact with its suppliers in order to collect and update relevant data.
- ECRIN Systems undertakes to inform its customers about the possible presence of a substance of very high concern within the meaning of REACH, subject to authorization and exceeding 0.1% of the total mass of one of its products.
- ECRIN Systems has undertaken this REACH compliance process in order to secure its supplies, ensure the sustainability of its activities and control that the use of component substances is legal.
